

Product: Decca BridgeMaster E Series Radars

Subject: 340 CRT type Monitors

IMPORTANT INFORMATION

There are several important issues regarding the 340 series 26 inch CRT type Monitors which now requires addressing.

1. Replacing the CRT

It is the Service policy that replacement CRTs are not be available. When necessary, the whole Monitor is to be replaced. Order spare part quoting complete Monitor type. e.g. X65826L, X65826P or 65826Z.

2. Original CRT now obsolete

The original CRT fitted in these Monitors are now obsolete. These CRTs were of the Dual Focus type. The current replacement CRT is of the Single Focus type. Monitors with this new type of CRT are already being shipped. Monitors whose serial number is **Works Order Number(xxx)/1971 or above** will have this new type of CRT.

The current T65826611-4 Rev B CRT Drive and Base Board Set will NOT be compatible with this new type of CRT.

A revised **T65826611-5 Rev A** Kit must be used. In this kit there will be two CRT Base PCBs with appropriate instructions for fitting the correct type.

3. Modification DX/11

This modification is incorporated with the new type Drive/Base PCB. It is very important that DX/11 is **NOT** applied to the new type CRTs.
